APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 22936, Certificate 6855, is issued subject to the terms and conditions imposed in said Permit 22936, Certificate 6855, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof The totalizing meter must be of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The well must be sealed with cement grout, concrete grout or

neat cement from ground level to 100 feet.

The total combined duty of water under Permit 68871 and any water of the Walker River Decree C-125, and storage water appurtenant to the place of use shall not exceed 285.96 acre-feet per season for the irrigation of 92.7 acres. The permit holder is responsible for insuring delivery of the entitled decreed and storage waters (surface waters) that are supplemental to this In years that the Walker River Irrigation groundwater permit. District declares a full allocation of decreed water to the C-125 decree claims supplemental to this permit, or is able to provide full delivery of storage water to lands supplemental to this permit groundwater shall not be pumped from the well described in this permit. In years that the Walker River Irrigation District declares a reduced allocation of decreed or storage waters to claims supplemental to this permit, then surface waters must be used in entirety before any groundwater can be pumped from the well to complete the allocated duty of acre-feet per acre. In years that the Walker River District has no decreed or storage water, then groundwater can be pumped from wells to provide the allocated duty for the permitted place of use. (CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed $\underline{\textbf{0.7837}}$ cubic feet per second, $\underline{\textbf{but}}$ not to exceed 285.96 acre-feet seasonally, and not to exceed a seasonal duty of 3.085 acre-feet per acre of land irrigated from any and/or all sources.
